

NORTHLAND TANK & FAB

USEMCO's Northland Tank and Fab Fuel Supply Tanks are single and double wall horizontal skid tanks, 2,000-gallons and below. We mass-produce and stock these at various levels. 10-year and 30-year limited warranties available for some versions.

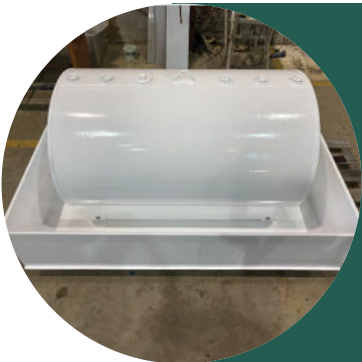

SINGLE WALL

Fuel Supply Tanks are used by contractors, small businesses, agricultural operators, and municipal facilities. They are an economical way to readily supply fleet vehicles and equipment with the necessary fuel for various operations.

DOUBLE WALL

Available in the Horizontal Cylindrical Configuration as either single or double wall construction to meet your installation code requirements. All Northland Tank and Fab double wall tanks are dual listed as both STI Flameshield and UL-142.

CUSTOM TANKS

Northland Tank and Fab Fuel Supply Tanks are available as custom-built, made-to-order units. Options include nozzle sizes, nozzle layouts, containment for single-wall versions, and various bolt-on accessories. For more details, please contact a USEMCO Sales Representative.
